House Committee Report

October 6, 2025 Meeting

By House Committee Chair Tyler M. Carey

Meg shared the below details regarding a visit from GPI and Kathleen from our Architecture firm.

The GPI crew were up in the ceiling looking at the AC handler, in the basement reviewing the panels and columns and outside taking more measurements. The bulk of the morning and early afternoon was spent with Kathleen reviewing our future plans. Ashley, Barron, Beth and Dawn were also involved in the meeting so Kathleen could get a better feel for what we're looking for in our new spaces. Kathleen spent time with Ashley reviewing thoughts and ideas for the new circ desk and the needs that she sees in that area. It was a very productive session, and I think we were able to fine tune some of what we are looking for. We also spent some time on different types of lighting, and she left some specs for us to review. She will be updating the plans and said she might have them in time for Monday's meeting.
